The annual consumption volumes relating to direct customers combined with eVISO in February 2024 are equal to 382 GWh and equivalent to an annual turnover of more than € 90¹ million, an increase of 19% compared to the <u>data communicated in December 2023 (320 GWh)</u>. Volumes recorded in February 2024 indicate that eVISO is approximately 12 months ahead of analyst consensus. I am confident that starting from spring the positive effects of the process of liberalization of the power market, postponed from January to July 2024, will also begin to materialize".
