

Press Release

EVISO EXCEEDS 1,000 ELECTRICITY AND GAS CONTRACTS SIGNED ON EVISO GIRO, THE APP THAT TURNS SPORT INTO ENERGY

**OVER 2.6 MILLION HOURS OF SPORT AND 5 BILLION STEPS TURNED INTO ENERGY TO BE
CREDITED TO THE BILL**

QUOTE REQUESTS UP SIXFOLD SINCE JUNE 2026

Saluzzo (CN), 19 October 2026 – eVISO S.p.A. (ticker: EVISO) – a technology company, listed on the EGM – announces that it has exceeded **1,000 electricity and gas supply contracts in the domestic segment**, signed since the launch of the commercial phase through eVISO giro, the proprietary digital application that turns sporting activity into energy for the bill. The app accumulates energy for every athlete in the world and enables anyone with a domestic supply connection in Italy to sign an electricity and gas supply contract fully independently, from uploading the bill to signing in the app in less than 3 minutes.

With over **122,000 downloads** and **39,000 active users**, **30% of whom joined in the last six months**, eVISO giro is the application developed by eVISO that, by connecting to the leading international platforms such as **Strava, Garmin, Google Health Connect and Apple Health**, accumulates the energy generated by people during sporting activities, carried out anywhere in the world, and transfers it to the **electricity bill of domestic customers in Italy**. Since the launch of eVISO giro, the user community has tracked over 2.6 million hours of sport across 1.7 million activities and almost 5 billion steps. The eVISO giro app is embedded in the app of the Italian Cycling Federation, which has almost 100,000 members.

The proprietary artificial intelligence reads the bill uploaded by the user and presents eVISO's best offers, highlighting the savings and associated benefits. The user can complete the entire subscription process, up to signing the contract, fully independently and directly from the application. To date, **over 60% of contracts have been signed independently by the user**. Each customer signs an average of 1.5 electricity and gas contracts and, in the financial year July 2025 – June 2026, the digital channel recorded a gross margin of over 60 €/MWh on electricity and 15 €/MWh on gas. The project is also recording strong commercial acceleration and **weekly quote requests have grown sixfold since June 2026, reaching 300**.

Gianfranco Sorasio, Chief Executive Officer of eVISO, commented: *"The value proposition of eVISO giro is simple and powerful at the same time: the more you move, the more energy you accumulate. The growth of the last quarter, the extraordinary in-house skills developed over the last 12 months and the pervasive presence of artificial intelligence in every single workflow are for me a strong indicator that the eVISO giro initiative has the potential to exceed the ambition of adding hundreds of thousands of new customers in the coming years".*

João Wemans, Chief Digital Platform Officer of eVISO, commented: *“eVISO has developed in-house the technology that converts sporting activity into energy and transfers it to the bill. Thanks to this infrastructure, managing each new user has a marginal cost. The more the user trains, the more energy they accumulate and the more advantageous it becomes for them to choose eVISO as their supplier. The objective is to bring contracts signed independently by customers from the current 60% to 90%, thanks to an ever-greater contribution from the proprietary artificial intelligence”.*

This press release is available in the Investor Relations section of the website www.eviso.ai. For the transmission of Regulated Information, the Company uses the EMARKET SDIR dissemination system available at www.emarketstorage.com, managed by Teleborsa S.r.l. – with headquarters Piazza di Priscilla, 4 – Rome – following the authorization and CONSOB resolutions n. 22517 and 22518 of 23 November 2022.

eVISO is a technology company that has developed a proprietary artificial intelligence platform that creates value in the commodities market. In the power and gas segment, eVISO operates across the entire energy value chain. Through its direct channel, eVISO serves more than 39,000 collection points across electricity and gas—small and medium-sized enterprises (SMEs), agricultural businesses, retail stores, and restaurants—via its sales network, agency channel, retail channel, and digital channel. The company also operates upstream by providing dedicated services to renewable energy producers throughout Italy. Through its reseller channel, eVISO serves more than 100 partner energy suppliers, supporting their commercial growth and operational management.
