

Press Release

EVISO'S GAS SEGMENT EXCEEDS 180 GWh UNDER MANAGEMENT IN SEPTEMBER 2025, GROWING +143% COMPARED TO SEPTEMBER 2024

THE GAS CHANNEL CONTINUES TO BE STRENGTHENED THANKS TO THE EXPANSION OF THE COMMERCIAL NETWORK AND CROSS SELLING TO CUSTOMERS ALREADY ACTIVE IN THE ENERGY SECTOR

Saluzzo (CN), 19 September 2025 – eVISO S.p.A. (symbol: EVISO) – COMMOD-TECH company, listed on the EGM, with a proprietary artificial intelligence infrastructure that operates in the raw materials sector (electricity, gas, apples) – communicates the data provided by the Integrated Information System (SII) – a public body that manages information flows relating to the electricity and gas markets – relating to the annual gas consumption volumes (direct channel and reseller) of the user base associated with eVISO in the month of September 2025 for the new 2025/2026 heating season.

In detail, the volumes combined with eVISO in the gas segment (direct and reseller channel) amounted to **182 GWh** (17 million scm), of which 161 GWh related to the direct channel and 21 GWh to the reseller channel, marking an **increase of 143%** compared to the 75 GWh (7 million scm) recorded in September 2024. The result reflects **the strategy implemented over the last year, aimed at stimulating significant growth in the gas segment** by strengthening the commercial network and cross-selling to customers already active in the energy sector.

In addition, eVISO reports that **the pipeline of contracts signed by resellers in the gas segment** has reached an annual ceiling of **164 GWh** (15.3 million scm), **an increase of over 53%** compared to the 107 GWh (10 million scm) [communicated in June 2025](#). To date, **12 resellers have signed a contract with eVISO**, of which 4 are new and 8 have renewed previous contracts, further consolidating market coverage in the gas segment.

With the release of the [CORTEX GAS](#) platform in March 2025, eVISO has simplified the upload and management of applications for any PDR for resellers, accelerating the flow of operations and improving efficiency. To operate more quickly, efficiently, and with greater quality, while fostering geographic expansion, **the number of distributors managed by the platform increased** in September 2025: **58 distributors** (+21% compared to the 48 announced in June 2025), **covering 88% of the national territory served by the gas network** (compared to 85.4% in June 2025). At the logistics level, eVISO is now accredited to operate 839 REMI (Regulation and Measurement stations; +137% compared to June 2025), equal to 28% of the total number of stations suitable for distribution.

Lucia Fracassi, General Manager of eVISO, commented: *"The 143% increase recorded in September 2025 compared to the same month in 2024 is the result of **structured, continuous, and regionally focused** efforts, supported by a **commercial expansion** that allows us to expand eVISO's position in new geographies and segments. Our ability to offer **integrated and scalable solutions** is proving successful in the gas segment as well".*

Carlo Cigna, Chief Technology & Product Officer of eVISO, commented: "eVISO's results in the gas segment are the result of constant refinement of our **CORTEX GAS** platform, which has revolutionized our business model, making it more scalable and competitive. Our advanced technological capabilities allow us to confidently address ever-changing, increasingly challenging and complex markets. Today, our customers can count on a complete and integrated offering: **CORTEX LUCE** and **CORTEX GAS**, two cutting-edge solutions that guarantee efficiency and flexibility".

For the transmission of Regulated Information, the Company uses the EMARKET SDIR dissemination system available at www.emarketstorage.com, managed by Teleborsa S.r.l. - with headquarters Piazza di Priscilla, 4 - Rome - following the authorization and CONSOB resolutions n. 22517 and 22518 of 23 November 2022.

About eVISO

eVISO is a COMMOD-TECH that has developed an artificial intelligence platform that creates value in the raw materials market, currently 3: power, gas and fresh apples. In the power segment, eVISO provides power-tech services (technology and electricity) in Italy along the entire value chain: through the direct channel (B2B and B2C), to other operators in the electricity market (B2B2C) and also upstream to producers of renewable energy throughout the Italian territory. In the direct channel, eVISO serves approximately 20,000 users: small and medium enterprises (SMEs), farms, shops and restaurants in Low Voltage and Medium Voltage. In the indirect channel (B2B2C), eVISO serves over 100 competitors and almost 400,000 users throughout Italy. For info: <https://www.eviso.ai/>
