

## Press Release

### **EVISO LUZ Y GAS (SPAIN): FIRST CONTRACT SIGNED FOR THE SUPPLY OF ENERGY AND SERVICES TO AN INTERNATIONAL RESELLER OPERATING IN THE SPANISH MARKET**

**Saluzzo (CN), 9 June 2026 – eVISO S.p.A. (symbol: EVISO) – technology company, listed on the EGM, operating in the electricity, gas and fruit sectors – announces that EVISO LUZ Y GAS, S.A., the company established by eVISO in Galicia in April 2026, signed an agreement with a leading international reseller providing, for the Spanish market, the supply of both electricity and sales support services, a completely new service launched on the market for the first time, with a direct contribution to the target of € 500 thousand Gross Margin by 2027.**

As of 2024, the Spanish electricity market comprises approximately 30 million electricity users (compared with 37 million in the Italian market), with total annual consumption of 225.6 TWh (compared with 293 TWh in Italy), of which 74.7 TWh are attributable to residential users and 34.3 TWh to SMEs<sup>1</sup>.

The agreement, signed with an international operator already served by eVISO in the Italian electricity and gas market, provides for two types of services:

1) the supply of electricity and related ancillary services, through the same model as the services already provided to resellers in the Italian market; this launch **concretely marks the transition to the commercial phase of eVISO's internationalisation strategy in the Iberian market**, bringing to the reseller channel the power offerings successfully developed in the Italian market;

2) the provision of billing, back-office and regulatory reporting services. The pilot phase of these services has a target of 500 active PODs. This new technological component, in addition to the supply of electricity, generates recurring monthly margins proportional to the PODs served, independent of energy prices and consumption volumes, with a direct contribution to the target of € 500 thousand Gross Margin by 2027.

**Carlo Cigna, Chief Technology Product Officer of eVISO, commented:** *“With this first contract, eVISO's artificial intelligence platform, already operational in the Italian market, enters the Iberian market and extends its proprietary technological infrastructure with a completely new set of ancillary services: billing services, back-office, regulatory monitoring and much more. This first step confirms the scalability of eVISO's platform-based business model across new geographical markets”.*

<sup>1</sup> Source: *Comisión Nacional de los Mercados y la Competencia CNMC: INFORME DE SUPERVISIÓN DE LOS MERCADOS MINORISTAS DE GAS Y ELECTRICIDAD Año 2024*

**Lucia Fracassi, Chief Executive Officer of eVISO, commented:** *“This first contract in Spain confirms that the model developed in Italy works and can be replicated. Following the establishment of eVISO Luz y Gas S.A. in April, within just a few weeks an international operator has already chosen the eVISO platform. The target of € 500 thousand Gross Margin by 2027 is concrete: it will result from both energy sales and the opening of the proprietary platform to third-party operators, a growth lever that makes the Iberian model even more scalable and distinctive compared with the standard approach in the sector”.*

The start of the supply of electricity and of the billing, back-office and reporting services will take place over the coming months, according to a schedule agreed between the parties. Any extensions of the agreement, including changes in volumes and quantities, will be subject of subsequent communications to the market.

This press release is available in the Investor Relations section of the website [www.eviso.ai](http://www.eviso.ai). For the transmission of Regulated Information, the Company uses the EMARKET SDIR dissemination system available at [www.emarketstorage.com](http://www.emarketstorage.com), managed by Teleborsa S.r.l. – with headquarters Piazza di Priscilla, 4 – Rome – following the authorization and CONSOB resolutions n. 22517 and 22518 of 23 November 2022.

#### **About eVISO**

*eVISO is a technology company that has developed a proprietary artificial intelligence platform creating value in the commodities market: power, gas and fruit. In the power and gas segment, eVISO operates along the entire value chain of the energy sector. In the direct channel, eVISO serves approximately 32,000 clients — Small and medium-sized enterprises (SMEs), agricultural businesses, shops and restaurants — through its commercial network, agency channel and retail channel; and also upstream, with services dedicated to renewable energy producers across Italy. In the reseller channel, eVISO serves over 100 partner sales companies, supporting their commercial growth and operational management.*
