

Press Release

EVISO GAS SEGMENT: COMBINED VOLUMES ABOVE 220 GWh (+80% YOY)

Saluzzo (CN), 22 January 2026 – eVISO S.p.A. (symbol: EVISO) – technology company, listed on the EGM, operating in the electricity, gas and fruit sectors – announces the data provided by the Integrated Information System (SII) – a public body that manages information flows relating to the electricity and gas markets – concerning the annual gas consumption volumes (direct channel and reseller) of users combined with eVISO in January 2026.

In January 2026, volumes combined with eVISO in the gas segment amounted to **222 GWh** (20.7 million cubic meters), up **22%** compared to the 182 GWh recorded in September 2025 (see [press release dated September 19, 2025](#)), equivalent to an average increase of 10 GWh/month.

Compared to the same month last year, combined volumes grew by **80%** from 123.5 GWh combined in January 2025.

The analysis by channel shows that 177 GWh came from the direct channel, up **46%** compared to 121.5 GWh in January 2025 (+10% compared to September 2025) and 45 GWh from the reseller channel, up more than **20x** compared to the 2.1 GWh recorded in January 2025 (+114% compared to September 2025).

Alongside the commercial expansion of volumes, eVISO has expanded both its technological platform for managing raw material gas and its capacity to access the physical network of gas distribution.

In terms of technology platforms, in March 2025 eVISO introduced the [CORTEX GAS](#) platform, which allows resellers to automate and simplify the operational management of procedures on any PDR, accelerating operational speed and improving efficiency.

In terms of access to the gas distribution network, **the number of distributors integrated and managed through the platform has reached coverage of 89.5% of the national territory served by the gas network.**

Thanks to this relevant technological upgrade, direct and reseller sales channels are now able to address nearly the entire Italian gas market in 19 regions.

In Piedmont and Liguria, regions where eVISO has a stronger presence, the market share in the direct and reseller gas segment is approaching 0.5% (0.4% in Piedmont and 0.1% in Liguria).

Lucia Fracassi, CEO of eVISO, commented: “January 2026 data confirm eVISO’s structural growth trajectory in the gas segment. Surpassing 220 GWh of combined volumes, with 80% year-on-year growth, is the result of a clear strategy that combines territorial expansion, the strengthening of direct and reseller channels, and targeted investments in our technology platform. These results demonstrate the scalability of the eVISO model, which allows us to grow rapidly and efficiently while maintaining strong

operational control and high service quality. eVISO continues to build an ecosystem that enables partner growth and generates sustainable value over time".

Carlo Cigna, Chief Technology & Product Officer di eVISO, commented: "January's results confirm the ability of eVISO's digital platform to operate effectively across rapidly expanding volumes and an increasingly broad geographic area. The growth in combined volumes highlights the strength of the operating model and the scalability of the infrastructure, which enables to integrate new distributors, expand territorial coverage, and ensure continuity and quality across processes. With CORTEX GAS, eVISO provides resellers with an advanced tool that automates the management of all operational workflows for any PDR, significantly improving efficiency".

For the transmission of Regulated Information, the Company uses the EMARKET SDIR dissemination system available at www.emarketstorage.com, managed by Teleborsa S.r.l. - with headquarters Piazza di Priscilla, 4 - Rome - following the authorization and CONSOB resolutions n. 22517 and 22518 of 23 November 2022.

About eVISO

eVISO is a technology company that has developed an artificial intelligence platform that creates value in the raw materials market, currently 3: power, gas and fruit sectors. In the power segment, eVISO provides power-tech services (technology and electricity) in Italy along the entire value chain: through the direct channel (B2B and B2C), to other operators in the electricity market (B2B2C) and also upstream to producers of renewable energy throughout the Italian territory. In the direct channel, eVISO serves approximately 20,000 users: small and medium enterprises (SMEs), farms, shops and restaurants in Low Voltage and Medium Voltage. In the indirect channel (B2B2C), eVISO serves over 100 competitors and almost 500,000 users throughout Italy.
